

12/27/55Vides Amplifier

Summary of Staff Meeting on Vides Amplifier 20 Dec.

I. Determine if would be better to continue the development of present prototype or to modify the unit. STAT

(a) Present unit:

- (1) will require lower output $\pm$ (for 300 sr Telex)
- (2) Stage of audio amplification (transistor)
- (3) want 100 hr. battery life.

(b) unit: STAT

- (1) will require pulse stretcher
- (2) audio amplifier
- (3) Repackaging
- (4) Battery life check.

II Points on which classification required STAT

- (a) Priority relative to audio oscillator
- (b) obtaining a unit if possible (for examination with respect to modification).
- (c) Components on hand for present prototype - how many can we build from present stock.
